🧠 Sara’s AI Tools Library (Notion template)

Hello there! I’m Sara Nóbrega and this is my database of favorite AI Tools 😉.

This is a growing collection of AI tools I personally track, test, or love.

You can **duplicate this database** into your own Notion workspace and use it as your go-to reference when exploring new AI tools.

I update this regularly, and I only add tools that are either useful, promising, or fun to experiment with. 🧠
✅ **Want to suggest a tool?** Feel free to reply to my newsletter or DM me with something cool—I'm always exploring.

Bonus: Livebench is probably the best benchmarking tool for testing whether or not a new AI model lives up to the hype.

💌 **Found this useful?** Please don’t gatekeep. Share it with a friend. 😉

AI Tools Database

Category	Tool Name	Short Description	Niche	Best For
Automation - Productivity ⚙️	**Zapier AI**	Zapier AI is a tool focused on automation and productivity. It's best for automating workflows and integrations. One key benefit: it allows you to connect to AI services like OpenAI and Google Cloud to build smarter automations.	Marketing, Content Creation, E-commerce	Non-technical users, startups, and small teams who want to automate repetitive tasks across SaaS apps without writing code.
Automation - Productivity ⚙️	**Make**	Make is a visual automation platform designed for productivity. It's best for advanced workflow automation. One key benefit: a powerful visual builder with highly customizable modules.	Marketing, Content Creation	Power users, marketers, and ops teams who need visually complex workflows, conditional logic, and API integrations.
Automation - Productivity ⚙️	**n8n**	n8n is an open-source automation platform. It's best for users who want flexibility and control over automations. One key benefit: native support for AI APIs like GPT-4 and Hugging Face.	Marketing, Content Creation, SaaS, Data Processing	Developers and technical teams looking for an open-source, self-hostable automation platform with full control and flexibility.
Automation - Productivity ⚙️	**UiPath**	UiPath is a market leader in robotic process automation (RPA). It's best for automating structured enterprise workflows. One key benefit: strong AI-based OCR for document processing.	Enterprise, Customer Support, Finance	Enterprises and IT teams that need advanced Robotic Process Automation (RPA) to handle structured, high-volume business processes and desktop software tasks.
Automation - Productivity ⚙️	**Automation Anywhere**	Automation Anywhere offers AI-driven enterprise automation. It's best for legal, finance, and large business operations. One key benefit: intelligent document processing with built-in AI capabilities.	Enterprise, Legal, Finance	Enterprise teams in finance, legal, healthcare, and operations that need scalable, AI-powered Robotic Process Automation (RPA) for automating structured, repetitive, and document-heavy business workflows.
Automation - Productivity ⚙️	**Microsoft Power Automate**	Power Automate is Microsoft’s automation tool for integrating apps and workflows. It's best for teams already using the Microsoft ecosystem. One key benefit: seamless integration with Excel, Teams, and Office 365.	Enterprise, SaaS, E-commerce	Microsoft-centric organizations and enterprise teams who want to automate processes across the Microsoft 365 ecosystem (Excel, SharePoint, Outlook, Teams).
Data Analytics & AI Automation ⚙️	**Relevance AI**	AI-native platform to create workflows, dashboards, and automation using vectors, embeddings, and no-code blocks.	AI Automation, Vector Search, Analytics	Ops teams, marketers, analysts, and product teams working with unstructured data or embeddings.
Spreadsheets (AI - enhanced database) 📊	**Airtable AI**	Airtable blends spreadsheets with databases for organizing info and automations. It's best for content planning, project tracking, and light no-code workflows. One key benefit: flexible views and powerful integrations via Zapier or Make.	Content Management, SaaS, Data Science	Content teams, product managers, and operations teams that need a user-friendly database to manage structured data, workflows, and collaborative projects.
Search Engines/Research (Lead Enrichment) 📈🔍	**Clay AI**	Clay AI automates lead generation and enrichment using real-time data. It's best for sales teams and B2B outreach. One key benefit: dynamic data scraping across platforms like LinkedIn and Apollo.	Sales, Marketing, Lead Generation, Email Outreach	- Growth marketers, advanced sales teams, and agencies that need **custom data enrichment** to personalize outreach. - Automating data enrichment -Personalizing outreach, Workflow automation - ”I have bad contact data”, “My outreach is not working”, “I need more data for better targeting” “I dont have enough customers”
Sales Intelligence 📈	**Hunter.io**	Hunter helps find and verify professional email addresses. It's best for cold outreach and email marketing. One key benefit: domain search and email verification tools built in.	Email Outreach, Lead Generation	- Sales Professionals - Recruiters - Marketers - Business Development - Managers - Freelancers, small businesses, and recruiters who need a **simple, reliable email finder**.
Search Engines/Research (Lead Prospecting) 📈🔍	**Apollo.io**	Apollo is a sales intelligence platform with outreach automation. It's best for SDRs and lead generation. One key benefit: enriched contact data + email sequencing.	B2B Sales, Email Outreach, Prospecting	- Automating B2B lead generation - Email outreach with AI-driven personalization - Managing & enriching sales pipelines - Sales teams, startup founders, and agencies that need a scalable sales outreach system.
Content Creation/Generator, Marketing Automation ✍️📣	**Jasper AI**	Jasper is an AI content generation platform. It's best for marketers, bloggers, and teams producing high-volume content. One key benefit: branded tone control and campaign templates.	Copywriting, Blogging, Social Media, Advertising	- AI-powered content writing for businesses - Automating social media & blog content - Generating marketing copy for ads, emails, and sales pages
Prompt Engineering IDE 🧑‍💻	**Promptmetheus**	An integrated development environment designed for composing, testing, optimizing, and deploying prompts for large language models (LLMs).	AI Development, Prompt Engineering	AI developers, prompt engineers, and teams aiming to enhance AI integrations and workflows.
Code Editors 🧑‍💻	**Cursor**	Cursor is an AI-enhanced code editor designed to streamline the coding process through advanced features like natural language code editing and intelligent autocompletion.	AI-Enhanced Coding, Developer Productivity	**- Software Developers** **- Programmers** **- Coding Enthusiasts** **- Development Teams**
Audio. AI-Powered Text-to-Speech & Voice Cloning 🔊	**ElevenLabs**	ElevenLabs offers ultra-realistic AI voice synthesis. It's best for creating lifelike audio narration and voiceovers. One key benefit: clone voices or create new ones with emotional range.	AI Voice Generation, Text-to-Speech (TTS), Voice Cloning	- Generating realistic AI voices for content, audiobooks, and media - Cloning voices for personalized voiceovers - Enhancing accessibility with high-quality TTS
Voice API Platform	**Vapi**	A platform offering APIs for integrating voice capabilities into applications.	Voice Integration, Telephony Services	Developers and businesses looking to incorporate voice functionalities into their applications.
Audio. AI-Powered Audio and Video Editing Tool 🔊	**Descript**	Descript is an audio and video editor powered by AI. It's best for podcasters and video creators. One key benefit: edit by editing text, not waveforms.	AI-Driven Media Editing, Transcription Services, Podcast and Video Production	**- Content Creators** **- Podcasters, Video Editors, Educators** **- Podcast and video editing based on transcripts** **- Video editing, storyboarding, and production tools, in addition to audio functionality**
Video Generators 🎬	**HeyGen**	HeyGen creates AI-generated avatars for video content. It's best for marketing, training, and scale-friendly video production. One key benefit: realistic avatars with text-to-speech in multiple languages.	AI Video Creation, Marketing, Training	**• Marketers** **• Content Creators** **•Educators** **• Businesses**
Productivity + Meeting Assistant 📝	**Fireflies**	An AI-powered tool that records, transcribes, and analyzes meetings to enhance productivity.	Meeting Productivity, Transcription Services	Teams and professionals aiming to capture and review meeting content efficiently.
Content Creation ✍️	**Gamma**	Gamma is an AI-powered tool for creating presentations and visual content. It's best for quick pitch decks and content sharing. One key benefit: auto-designs and formats based on your input.	- Generate presentations, documents, and webpages based on outlines or docs. - AI-Driven Presentations, Documents, and Websites	- Professionals looking for new ways to package information, including docs, non-traditional decks, and webpages - Content Creators, Educators
Developer Tools. AI-Powered Framework for LLM Applications 🧑‍💻	**LangChain**	LangChain is a framework for building applications with LLMs. It's best for developers building AI agents, chatbots, or knowledge tools. One key benefit: supports memory, tool usage, and custom chains out of the box.	AI Application Development, Large Language Model (LLM) Orchestration	- Developers building AI-powered applications with LLMs (e.g., OpenAI’s GPT, Claude, Llama) - Businesses needing **AI-driven automation** for chatbots, summarization, or custom AI agents - AI startups looking to **integrate multiple AI models & data sources** into one pipeline
Automation, AI Development, Developer Tools 🧑‍💻⚙️	**CrewAI**	Crew AI helps orchestrate multiple AI agents to work together on tasks. It's best for advanced automations and agent workflows. One key benefit: supports multi-agent collaboration with role assignments.	Multi-Agent Systems, Workflow Automation, AI Orchestration	- Organizations aiming to deploy collaborative AI agents - CrewAI is designed to be **easily integrated into business workflows**. - Developers and enterprises seeking to automate complex workflows - Teams looking to enhance productivity through AI-driven processes - Multi-agent collaboration - **Team-based AI workflows where different AI agents need to collaborate** on a task
AI Agents, Chatbots	**Agentive**	A platform to build, manage, and deploy AI agents that collaborate, automate workflows, and connect to tools and APIs.	AI Agents, Workflow Automation, Smart Chatbots	Developers, startups, and teams building production-ready AI agents or advanced chatbots with memory and tools.
Developer Tools. Autonomous AI execution 🧑‍💻	**AutoGPT**	AutoGPT is an experimental open-source AI agent that can plan and execute tasks. It's best for tech-savvy users experimenting with autonomous workflows. One key benefit: chains GPT calls to simulate reasoning and decision-making.	Autonomous AI Agents, Task Automation	- Fully autonomous AI loops - Developers seeking to automate complex, multi-step tasks without continuous human input. - Businesses aiming to leverage AI for autonomous research, content creation, or process optimization. - Tech enthusiasts exploring the capabilities of autonomous AI systems.
Developer Tools. Autonomous Task Management AI 🧑‍💻	**BabyAGI**	BabyAGI is a lightweight autonomous agent powered by OpenAI and Pinecone. It's best for testing simple task loops with memory. One key benefit: runs recursive task lists with contextual updates.	Autonomous Task Management, AI Workflow Automation	-Individuals or teams seeking to automate task creation, prioritization, and execution. - Developers interested in experimenting with autonomous AI capabilities in task management. -Organizations aiming to streamline operations through AI-driven task automation.
Developer Tools. AI Agents 🧑‍💻	**Sana Agents**	Sana Agents are autonomous AI workers that execute business tasks. It's best for scaling internal processes and support. One key benefit: combines internal knowledge + automation to take action.	Knowledge Management, Workflow Automation	**• Enterprises** **• Knowledge Workers** **• Human Resources** **-Departments** **• Customer Support Teams**
Data Enrichment 🧬	**Clearbit**	Clearbit enriches leads and provides data on companies and contacts. It's best for sales and growth teams. One key benefit: real-time enrichment based on email or domain.	Sales Intelligence, Marketing Automation	**• Sales Teams** **• Marketers** **• Business Development** **• Customer Success Teams**
